I want to recommend this game, but I encountered a game-breaking glitch in the graveyard area with the guillotines. The game kept crashing everytime i died, but dying is essential for the puzzles here, so I am blocked from completing the game.. I liked this game alot,

I had a few issues with it,

But the game is easily worth the five dollars.

Check out my playthrough right here,

. Very powerful engine. Baby Bear just ends up killing you in the end after Papa Bear jumps in. Why? Kind of pointless. And very rude. Please feel bad about your decisions. [No but seriously it seems a bit silly even for this kind of game.]. Great casual gaming experience. For the price it is a fun game. Not a ton of content, but challenging to master and fun to play with a friend (local co-op). I hope other developers take note of this game formula, the co-op adds a fun element to a normally isolating VR experience. The ability to play along with a controller is cool. Overall a solid game. Also, you won't be able to get the music out of your head. Mix tape number 1 for the win!!!. Has its downfalls, but overall a great RTS.

Game starts out initially interesting, with graphics you would expect from an indie game. Approximately 5 sectors in it deleted all my progress and forced me to start over (so imo it wasn't worth my time)

Pros:

-----

You utilize your brain to solve puzzles  
There is more than five kinds of puzzles  
Theres combat mixed in to your puzzles

Cons:

-----

- Glitchy targeting/vfps
- Sometimes you will get stuck falling through the map over and over again until you can quickly reset to last checkpoint or restart level before dying again.
- Possibility of losing all progress, which really isn't too challenging, is time consuming.
- Graphics caused eye cancer, although I expected poor graphics.
- After three sectors you've basically seen every challenge the game has to offer
- Albeit there is more than 5 types of puzzles, they recycle endlessly after sector 3. Game is dead and at current price totally not worth it. quot;0.13 for a beta...nice ?" 3/100 ~IGN
- . A first-person adventure game with a text parser? Sign me up!

Cleverness abounds from this low-budget indie game. Your vocabulary skills equal points, so e.g. if you "take" an object you get less points than if you, say, "acquire" or "retrieve" it. But all that is just flavor and don't influence the game itself, which is a smart move.

The wonkiness of the graphics (2D flat sprites in a 3D world) would seem like a downfall of any other game, but here it adds to the otherworldly mysteriousness of it all. Combine that with an excellent musical score by Makeup And Vanity Set and you've got a dream-like atmosphere like no other.

Only downside (for me) is that when I streamed this game, I kept getting copyright strikes from Makeup And Vanity Set's publishers. Licensing music to a game and then cracking down on YouTubers who try to play said game is NOT cool.. I like this game,I really do.

The idea of it,the pixelated artstyle but....

Why I die so easily???Dude has a heart attack SO EASILY!

And worst of it is....that I have to start the WHOLE thing again from the beginning...

There's no save points....which sucks....
